

**LIGHTNING PROTECTION AND EARTHING SYSTEM COMPONENTS**

**150 gr welding powder for exothermic welding  
 Part number ELEMKO : 18 20 150**

Description

150 gr welding powder used to perform exothermic welding. It is available in plastic containers with brown cover, in which is also contained starting powder (at the end with black cover) for easy ignition.

Close the tap hole with the metallic disc before to dump the welding powder into the crucible.
