

LIGHTNING PROTECTION AND EARTHING SYSTEM COMPONENTS

200 gr welding powder for exothermic welding
Part number ELEMKO : 18 20 200

Description

200 gr welding powder used to perform exothermic welding. It is available in plastic containers with blue cover, in which is also contained starting powder (at the end with black cover) for easy ignition. Close the tap hole with the metallic disc before to dump the welding powder into the crucible.
