

LIGHTNING PROTECTION AND EARTHING SYSTEM COMPONENTS

Conductor fastener on water proof flat roofs, with adapter for tape conductor
Part number ELEMKO : 61 30 100 (empty)
Part number ELEMKO : 61 30 101 (with concrete)
Part number ELEMKO : 61 30 107 (Adapter)

Description

Conductor fastener, suitable for fastening tape conductor on waterproof flat roofs covered with membrane.

The conductor is clipped on the fastener in intervals of 1 m, without using any tool. It is made out of synthetic material, suitable for external installation and resistant to ultraviolet radiation as per IEC / EN 62561-4.

The fixation of the fastener on the membrane is achieved by its weight (1,4 kg filled with concrete). Due to this weight as well as to the number of above intervals there is no necessity to be adhered.

In case Any adherence material suitable for Propylene PPC 5660 could be used if also appropriate for the membrane material.

Technical characteristics – Installation instructions

Conductor's dimensions	➤ 25x3 mm
Compatibility with conductors made of	➤ Al, Cu, Cu/eSn, Stainless Steel, St/tZn
Weight of fastener filled with concrete	➤ 1,4 kg
